JOB OBJECTIVE

For the last two years, I have worked at AN-GAZ company, where I was responsible for sales development and product delivery organization.
I spent the last year on intensive learning of front-end technologies.
In the near future I want to develop my skills further in React, and then towards a full-stack developer.

PROJECTS

Eventify   CODE   PREVIEW

React application allowing to search and save in database (Firebase) favourite concerts and music artists.

Yahtzee   CODE   PREVIEW

Dice game - Yahtzee. Application was created in React. Highscores are saving in Firebase.

Coffee Republic   CODE   PREVIEW

Fictional company website, created with Gatsby and GraphQL.
